Description

The European Bank for Reconstruction and Development (EBRD) is an international financial institution founded in 1991. As a multilateral developmental investment bank, the EBRD uses investment as a tool to build market economies. Initially focused on the countries of the former Eastern Bloc it expanded to support development in more than 30 countries from Central Europe to Central Asia. Similar to other multilateral development banks, the EBRD has members from all over the world, with the biggest single shareholder being the United States, but only lends regionally in its countries of operations. Headquartered in London, the EBRD is owned by 71 countries and two European Union institutions, the newest shareholder being Algeria since October 2021. Despite its public sector shareholders, it invests in private enterprises, together with commercial partners.
